## Our Technology

Adherium's Hailie<sup>®</sup> solution is the world's most clinically supported asthma and COPD medication adherence solution.

Adherium's Hailie<sup>®</sup> solution is a cloud-based platform which captures medication use data from MHRA Class I approved Bluetooth<sup>®</sup> enabled sensors which wrap around patient inhalers and provide real-time feedback to patients via the Hailie<sup>®</sup> app, ORCHA rated 79%, and to their physicians via the Hailie<sup>®</sup> portal.

## About Adherium

Adherium Limited is an international Respiratory eHealth company partnered with Helicon Health UK distributor focused on patient medication adherence, remote monitoring, and data management solutions for patients, payers, and providers.

## About Helicon Health

Helicon Health is a medical technology development company, an NHS-focused contract research partner and specialised medical device accelerator. A spin-out from the UCL Centre for Health Informatics and Multi Professional Education (CHIME), it researches and develops standards for electronic health records and interoperability. These research programmes lead to the OpenEHR and other ISO Standards.
